Access Control Solutions

Today's access control systems are designed to offer a single platform to manage and monitor activities surrounding and within a single building or multifacility campus.

CCTV, intrusion detection, building controls, visitor management and human resource systems can all be integrated on one platform.

Lobby Control Solutions

Whether your lobby management needs call for a solution that is standalone, offers true real-time integration to access control and/or other systems, is cloud based or on-premises based, is a manned/unmanned kiosk solution Global has the expertise to assist in the selection, implementation and support of the chosen visitor management system.

Video Surveillance

Closed Circuit Television (CCTV) systems have evolved from a camera, a monitor and a video recorder to IP (Internet Protocol) and HD (High Definition) cameras and Onsite and Cloud recording that is accessible from any device, anytime, anywhere. Integrating today's CCTV technology with video analytics, facial recognition, remote monitoring and integration to other network/building information systems Global provides clients with required functionality at affordable pricing.

About Global Integrated Technologies, Inc.

Global Integrated Technologies, Inc. has the unique ability to deliver complete Electronic Security and IT Solutions to meet clients' current and future challenges. In a time when IT and Electronic Security from design, regulatory, implementation and support perspectives, have become interconnected, Global's ability to deliver both complete Electronic Security and IT solutions offers our clients a coordinated single point of contact.

Global assists clients in developing systems which meet initial functional and budgetary needs while offering ease of use, state of the art technology, and a long-term growth path.

Utilizing the products of a variety of leading manufacturers Global is able to:

- Consult with our clients in developing customized solutions
- Employ the latest technologies
- Meet each client's unique requirements

Global provides our clients the ability to concentrate on their core responsibilities... their Business.

Global manages installations to be delivered on time, within budget and have minimal impact on clients business operations, employees, and customers.

Communication

Mass Notification Systems, Emergency Communication, Blue Light Systems, Area of Rescue Communication systems provide the ability to communicate through multiple forms of notification systems to push out a variety of alerts and warnings to prompt as many people as possible to react appropriately.
